

# Configure an RP Proxy

Once your Moonshot RP Proxy has been installed, there are various ways in which it can be configured.

**Contents:**

- [Client configuration](#)
- [Static realm configuration](#)

## Client configuration

- [Allowing a Moonshot Application/Service \(i.e. a RADIUS client\) to connect to your Moonshot RP Proxy](#)

## Static realm configuration

- [Configure a Moonshot RP Proxy to use a static connection to a Moonshot IdP](#)
