

# Source Access

Most parts of Moonshot are open source, released under the BSD license. This page gives details on how to get source access.

## Source Access

Moonshot uses Github to manage the software project. In the Janet UK organisation, you can find a set of repositories for the modules taking part of Moonshot.

- libradsec: <https://github.com/janetuk/libradsec>
- moonshot-ui: <https://github.com/janetuk/moonshot-ui>
- mech\_eap: [https://github.com/janetuk/mech\\_eap](https://github.com/janetuk/mech_eap)
- trust\_router: [https://github.com/janetuk/trust\\_router](https://github.com/janetuk/trust_router)
- freeradius: <https://github.com/janetuk/freeradius>

## Contributing

In general, commit access is not required as contributions are handled by means of Pull Request.

## Bug Tracking

Bugs can be reported as Issues.
